

STEVENS COUNTY NEWSLETTER

Program Opportunity!

During the 2019-2020 school year we were honored to explore health career opportunities with your children through our 7th grade hands on engagement series.

Now, we are proud to launch our 8th grade mentorship program that is available for all 8th grade youth in your local school. This program builds on the 7th grade engagements but adds case-based learning opportunities, hands on learning engagements and mentorship in career awareness, all in the local schools! These activities will take place throughout the school year during class time with parent and student agreement. Please fill out the subsequent form and stay tuned for future communications reporting on student stories and experiences.

For any questions please email: stevensmentorship.medicine@wsu.edu or contact Jessica Gerdes at 509-358-7823.

You can't be what you can't see.

7th-9th Grade Health Career Exploration

The skills we are targeting include leadership, communication, interpersonal skills, intellectual curiosity, ethical responsibility, teamwork, collaboration, resiliency, and adaptability. These skills will be an asset to every student pursuing any career path but are essential for care-giving careers in the health care sector.

Passionate Volunteers

The team gearing up to meet students for the first time. We left Spokane at 6:30am on 10/8/19 in three vehicles to be ready when students arrived.

Student Voices

Helping students express who they are acknowledges their value and worth. Student leadership prizes for contribution help!

Engagement

"Who knows why listening to your heart with a stethoscope and taking your pulse is important?" Learning the basics with WSU College of Nursing students.

Hands on Learning

Dental Hygiene students with EWU showed why removing plaque and caring for your teeth is important.
